

Hilyat sh'ar, Hair Ornament

Medium

Turquoise, brass

Description

Rough, slightly lopsided oval turquoise with dark brownish black inclusions along one edge and in center sits in a high bezel collet. The surround is a rounded, faintly triangular form, with raised dots around the border, edged with fine twisted wire. The stone and collet do not fill the center of the surround. Soldered to the back are three rings, one on one side, and two on the other, one-half of each projecting past the edge, forming loops.
